ADAC 3 Städte Rallye

-

Accessibility Statement

The ADAC 3 Städte Rallye aims to enable as many people as possible to take part in the event. We are constantly working to remove barriers and make access to the event easier.

Below you will find information on the event's accessibility.

Spectator areas

For the 2026 ADAC 3 Städte Rallye, at least three designated accessible spectator areas will be set up.

These areas will feature:

- access routes that are as level as possible
- short distances from the car park to the spectator area
- a clear view of the action
- accessibility for people with disabilities

Detailed information on the locations will be published in good time before the event.

Service Park & Welcome Centre

The main event areas of the ADAC 3 Städte Rallye will be designed to be accessible.

This includes, in particular:

- accessible entrances
- accessible toilet facilities (where available)
- accessible visitor information
- Assistance from event staff where required

Getting there & parking

Accessible parking is provided at selected venues.

To find your way to the spectator areas, we recommend using RallyPin. It lists all official spectator areas, parking areas and important travel information.

Information & Communication

Information about the event is mainly provided digitally.

This includes, amongst other things:

- Spectator information
- Timetables
- Parking and transport information
- Information on accessible facilities

On-site support

If you have any special requirements or questions regarding accessibility, we'll be happy to help.

Please contact us as early as possible before the event.

Please note

Despite our best efforts, due to the specific nature of a rally event held on public roads, it is not possible to make all areas fully accessible. However, we are constantly working to further improve the accessibility of the event.
